Draft for University Legal Office review

This version is not yet effective. It is published for review by the University Legal Office. The proposed effective date is October 27, 2026.

LEGAL

Privacy Policy

How PakaonAI collects, uses, shares, and protects personal data.

VERSION	STATUS	APPLIES TO
1.0	Draft — pending University Legal Office review	PakaonAI app release 1.11.0

LAST UPDATED	PROPOSED EFFECTIVE DATE	REVIEWED BY
October 26, 2026	October 27, 2026	Pending University Legal Office review

At a glance

PakaonAI is a precision feeding research prototype for African catfish (*Clarias gariepinus*), developed as a capstone project at the Iloilo State University of Fisheries Science and Technology (ISUFST), Dingle Campus. This policy explains what personal data we collect, why we collect it, who we share it with, how long we keep it, and the rights you have under the Philippine Data Privacy Act of 2012 (Republic Act No. 10173) and its Implementing Rules and Regulations.

- We collect account, farm operations, device telemetry, AI assistant, website, and research data.
- For farm operational data, the farm or cooperative is the personal information controller (PIC); PakaonAI is a personal information processor (PIP) acting on its instructions. For account, website, AI, and research data, PakaonAI is the PIC.
- We use Supabase (Singapore), Vercel (Sydney, including Vercel Analytics and Speed Insights), OpenCodeGo, Resend, and Google Forms. We do not sell personal data, run advertising, or use Telegram.
- Research data comes from an optional name, date, role, and questionnaire answers. We do not ask for email, phone, audio, video, photos, or sensitive personal information.

- You have rights to be informed, object, access, correct, erase or block, portability, damages, and complaint. Contact our DPO; we aim to respond within 14 business days.
- This version is a draft for University Legal Office review. It is not yet effective.

Plain-language promise

We collect what the system needs to feed fish accurately and to evaluate the capstone. We do not sell your data, and we do not use it for advertising. If something here is unclear, email the DPO and ask before you use the service.

Who we are and our roles

The personal information controller for this website, the PakaonAI dashboard, the progressive web app, the AI assistant, and the research questionnaires is:

PakaonAI Capstone Project

College of Information and Communication Technology

Iloilo State University of Fisheries Science and Technology, Dingle Campus

Dingle, Iloilo, Philippines

Farm operational data

When a farm, cooperative, or independent farmer enters pond, biomass, feeding, harvest, or device data, that farm controls the purpose and extent of the processing. The farm is the PIC for that data. PakaonAI is the PIP and processes the data only to provide the service, secure it, and follow the farm's instructions. A farm may request a written data processing agreement for its pilot deployment.

If you are a farm worker or operator, please contact your farm administrator first for requests about farm operational data. We will assist the farm in responding.

Data Protection Officer

Our designated Data Protection Officer and privacy contact is **Jeff Edrick C. Martinez**. You can reach the DPO at privacy@pakaonai.syntaxure.dev or at PakaonAI Capstone Project, College of Information and Communication Technology, ISUFST Dingle Campus, Dingle, Iloilo, Philippines.

NPC registration status

PakaonAI is a research capstone project. It has not yet registered a data processing system with the National Privacy Commission. It will register if the processing meets the NPC's registration criteria or before commercial deployment. This does not affect your rights or our commitment to protect your data.

Scope of this policy

This policy covers personal data processed through:

- the PakaonAI public website and login page;
- the authenticated web dashboard and its settings, biomass, schedule, growth, harvest, history, and audit pages;
- the installable progressive web app (PWA), including its offline snapshots and outbox;
- the ESP32 feeder service, device telemetry, commands, and acknowledgements;
- the AI assistant and feeding recommendation features;
- email notifications sent through Resend; and
- the capstone research questionnaires collected through printed forms or Google Forms.

This policy does not govern third-party websites or services that we use, such as Google Forms/Drive, Supabase, Vercel, OpenCodeGo, or Resend. Those services have their own privacy notices. We choose processors that offer appropriate safeguards, but their independent processing is described in their terms.

This policy is aligned with RA 10173 and its IRR. It is not a claim of NPC certification, accreditation, or a guarantee that no incident can occur.

Data we collect

CATEGORY	WHAT IT INCLUDES	WHERE IT COMES FROM
Account and access	Farm ID, display name, pond-provisioned email address, role and membership, authentication metadata, session information, IP address, rate-limit and lockout records, and audit events. Passwords are handled by Supabase Auth; we do not see plaintext passwords.	You, your farm administrator, Supabase Auth, and our security logs.
Farm operations	Farm and pond names; pond area and depth; stocking date, count, and weight; grow-out cycles; biomass samples (weight, length, count, batch label); FCR and SGR values; feeding schedules; feed events; harvest records; calendar events; and notes.	Farm staff and administrators through t dashboard, imports, or device records.
Device and telemetry	Device ID/MAC address, a hashed device token, firmware version, last-seen time, hopper feed level, water temperature, RTC status, commands and acknowledgements, dispense events, offline queue entries, and device audit events.	The ESP32 feeder and t dashboard.
AI assistant	Chat messages and prompts, pond context needed to answer (such as biomass, FCR, schedule, and cycle status), and generated recommendations. Chat history is kept in your browser session storage.	You, when you use the chat or advisor, and the data already in your farr records.
Research	Optional name, date, role (IT expert, hardware/electronics expert, agriculturist, or farm operator/field expert), and questionnaire responses under the ISO/IEC 25010:2023 evaluation. We do not ask for email, phone, audio, video, photos, or sensitive personal information.	Printed forms or Google Forms completed by the 20 farmer and 10 IT professional respondent
Website and technical	IP address, user agent, request logs, error logs, timestamps, locale and theme preferences, remembered farm ID, security/rate-limit records, and aggregate page-view and performance measurements from Vercel Analytics and Speed Insights.	Your browser and our hosting infrastructure.
Offline and local	Dashboard and page snapshots, the active pond, pending biomass samples, and the service-worker cache stored on your device. These may contain farm data.	Your browser when you use the PWA or go offlir

Please do not enter sensitive personal information

We do not intentionally collect sensitive personal information such as health, biometrics, government IDs, financial account details, precise location, or information about minors. Please do not enter it in biomass notes, chat, imports, or research forms. If you believe sensitive data has been entered, contact the DPO so we can assess and, where appropriate, delete it.

How and why we use data

PURPOSE	EXAMPLES	LAWFUL BASIS
Provide the service	Create and secure accounts, show the dashboard, calculate biomass, store farm records, and operate the feeder schedule.	Contract or steps before a contract with the farm or user.
Device control and telemetry	Send feed amounts, receive dispense confirmations, show hopper and temperature readings, and replay offline events.	Contract with the farm or user.
Security and reliability	Authenticate sessions, enforce role-based access, rate-limit login attempts, lock out repeated failures, and keep audit logs.	Legitimate interests in protectin the service and users; legal obligations where applicable.
Notifications	Send missed-feeding, device-offline, hopper-low, harvest, and sampling reminders by email.	Contract or consent, depending on the notification and your settings.
AI advice	Generate a chat answer or a feeding recommendation from the pond context you provide.	Contract or legitimate interests providing the feature; the recommendation is advisory on
Research and evaluation	Evaluate the system with farmers and IT professionals under ISO/IEC 25010:2023 and publish aggregated results.	Your consent as a research participant.
Improve the service	Use aggregated or de-identified statistics and aggregate Vercel Analytics/Speed Insights measurements to understand errors, usage, and performance.	Legitimate interests; data is aggregated or de-identified so i no longer identifies you.
Legal compliance	Respond to lawful requests, preserve records for legal claims, or meet regulatory duties.	Legal obligation or the establishment, exercise, or defense of legal claims.

Where we rely on consent, you may withdraw it at any time. Withdrawal does not affect processing that already happened, and it does not stop processing that is based on another lawful basis. We do not sell, rent, or trade personal data, and we do not use it for advertising.

AI advice and automated processing

The AI assistant and feeding recommendation features use **OpenCodeGo** to generate responses. The prompt may include the pond context needed to answer, such as recent biomass samples, FCR, schedule, population, and cycle status. Chat history is kept in your browser session storage and is sent to the provider only when you use the feature.

- We have enabled the training opt-out on our OpenCodeGo account. We do not use your data to train our own models.
- OpenCodeGo may process or retain data under its own terms. We minimize the prompt and do not send account passwords, device tokens, or sensitive personal information.
- The AI recommendation is **advisory only**. It is not the sole basis for a decision that significantly affects you, and it does not replace your judgment, fresh sampling, or the device's RTC schedule and physical button.
- Do not enter sensitive personal information, credentials, or other people's data in the chat. If you do, we may remove it.
- If you prefer not to use AI processing, you can use the deterministic feed calculator and the manual schedule controls without opening the AI chat or advisor.

Cookies, local storage, and offline data

We use essential and functional storage to keep you signed in, remember your language and theme, and let the app work offline. We also use Vercel Analytics and Speed Insights for aggregate traffic and performance measurement. We do not use advertising cookies or build advertising profiles.

NAME	PURPOSE	TYPE AND RETENTION
Supabase auth cookies (sb-*-auth-token)	Keep you signed in and refresh your session.	Essential cookie; sessio or refresh lifetime.
Locale preference	Remember English or Hiligaynon.	Functional; persistent ur cleared.
optifeed:theme	Remember light or dark mode.	Functional localStorage; persistent until cleared.
optifeed:last-farm-id	Remember the farm ID on this device if you tick the box.	Functional localStorage; opt-in; until cleared.
optifeed.chat.history	Keep the current chat conversation.	Session storage; until th tab/session ends or you sign out.
optifeed:offline:snapshots:v1, optifeed:offline:active:v1, optifeed:pwa:dashboard:v1	Show the last known farm state offline.	Functional localStorage; until sign-out or manual clear.
IndexedDB optifeed-offline and optifeed-offline-outbox	Store per-pond snapshots and queued biomass samples for offline use.	Functional browser database; until sign-out manual clear.
pakaonai-static-v2 cache	Serve the app shell and static assets offline.	Service-worker cache; replaced on version updates.
Vercel Analytics and Speed Insights	Aggregate page views and Core Web Vitals performance measurements.	No advertising cookies; aggregate measurement handled by Vercel.

Offline data stays on the device

Offline snapshots and queued samples are stored in your browser and are not encrypted by PakaonAI. They may contain farm data. Use a trusted device, sign out when you finish, and clear the browser data if you share the device. Signing out or opening the login page clears the stored snapshots and outbox.

Because we only use essential and functional storage plus aggregate, cookie-free measurement, we do not show a cookie consent banner. If we add advertising or other non-essential cookies, we will update this policy and ask for consent where required.

Sharing and subprocessors

We share personal data only as needed to run the service, secure it, comply with the law, or complete the research. We do not sell or rent personal data.

PROVIDER	PURPOSE	LOCATION	SAFEGUARD
Supabase, Inc.	Authentication, database, file storage, and backups.	Singapore	Access controls, encrypti in transit and at rest, and Supabase data processin terms.
Vercel, Inc.	Application hosting, server functions, operational logs, and aggregate Vercel Analytics/Speed Insights measurement.	Sydney, Australia	Access controls, encrypt transport, and Vercel data processing terms.
OpenCodeGo	AI inference for the assistant and feeding recommendations.	Per OpenCodeGo's terms	Training opt-out enabled our account; prompts are minimized and must not contain sensitive persona information.
Resend, Inc.	Transactional email delivery for account and farm notifications.	Per Resend's terms	Only the recipient addres and the notification conte are shared; no marketing lists.
Google LLC (Google Forms / Drive)	Research questionnaire collection and storage for the capstone evaluation.	Per Google's terms	Responses stay in Google Forms/Drive and are accessible only to the researchers; email collection is disabled in th form.

Other recipients

- **Farm administrators and tenant members.** They can see the farm data they are authorized to manage.
- **University Legal Office, adviser, and evaluation panel.** They may review the research records and this policy under confidentiality.
- **Journal editors and peer reviewers.** They receive only aggregated or anonymized results, unless you give separate written consent for more.
- **Government authorities and courts.** We disclose only when required by law or a valid legal process.
- **Professional advisers.** Lawyers, auditors, or insurers may receive data under confidentiality when needed to protect the project.

Google Forms responses stay in Google Forms/Drive and are accessible only to the researchers. Printed forms are kept in a locked cabinet accessible only to the researchers. We do not use Telegram for alerts.

International transfers

Some of our processors are outside the Philippines. Supabase stores data in Singapore; Vercel hosts the application in Sydney, Australia; Google, OpenCodeGo, and Resend may process data in the locations described in their terms. This means your data may be transferred to, stored in, or accessed from another country.

We use contractual terms, access controls, encryption in transit and at rest where available, and data minimization to protect transfers. Where Philippine law requires a specific basis or safeguard for a transfer, we will put it in place before the transfer. Contact the DPO if you want more information about a specific processor.

How long we keep data

We keep personal data only as long as needed for the purpose, for legal claims, or as required by law. The table below summarizes the current schedule.

DATA	RETENTION
Account and access data	While the account is active, then 30 days after deletion for recovery and audit.
Farm operational records	5 years after the record is created, unless the farm instructs earlier deletion or legal hold applies.
Security, rate-limit, and audit logs	90 days, unless needed for an incident investigation or legal claim.
AI chat	Session storage until the tab/session ends or you sign out. Prompts sent to OpenCodeGo are handled under its terms.
Import/export job artifacts	7 days after the job completes or fails.
Backups	Up to 30 days, then overwritten or deleted.
Offline snapshots and outbox	Until sign-out, opening the login page, or manual browser clear.
Research questionnaires and consent records	Until the capstone is completed and the resulting paper is published in a reputable research journal, then for the period required by the University's records policy or the journal's data-availability policy, whichever is longer. Afte that, the data is securely destroyed.
Aggregated or de-identified statistics	May be kept longer because it no longer identifies you.

When a retention period ends, we delete, anonymize, or securely destroy the data. Printed forms are shredded; Google Forms responses are deleted from Google; research contact data, if any, is deleted from Supabase. A legal hold or a journal's data-availability policy may extend a period; we will document it.

How we protect data

Organizational

- Role-based access with tenant memberships and platform-admin separation.
- Least-privilege access for researchers, farm administrators, and operators.
- Confidentiality commitments for the project team, adviser, and panel.
- Incident response and DPO contact for suspected breaches.

Physical

- Printed research forms are kept in a locked cabinet accessible only to the researchers.
- The ESP32 enclosure protects the controller from moisture and accidental contact.

Technical

- Encrypted transport (HTTPS/TLS) between your browser, the app, and the device APIs.
- Supabase encryption at rest and access controls.
- Hashed device tokens and timing-safe token comparison.
- Login rate limits, lockout rules, session validation, and audit logs.
- Backups and recovery controls provided by Supabase and Vercel.

No method of transmission or storage is completely secure. If you suspect unauthorized access, contact the DPO immediately. Offline snapshots are not encrypted by PakaonAI, so treat the device as sensitive when it contains farm data.

Your data privacy rights

Under the Data Privacy Act, you have the right to:

- be informed whether your personal data is being or has been processed;
- object to processing, including direct marketing, automated processing, or profiling;
- reasonable access to your data, its source, recipients, and how it was processed;
- dispute inaccuracy and have it corrected;
- suspend, withdraw, or order the blocking, removal, or destruction of data in the cases allowed by law;

- be indemnified for damages caused by inaccurate, incomplete, outdated, false, unlawfully obtained, or unauthorized use;
- data portability for data processed electronically in a structured, commonly used format; and
- lodge a complaint with the National Privacy Commission.

How to exercise your rights

Email privacy@pakaonai.syntaxure.dev with your name, farm ID (if applicable), the right you want to exercise, and enough detail for us to find the data. We may ask for reasonable proof of identity to protect you from impersonation. We aim to respond within **14 business days**. This is a service standard, not a statutory deadline.

Requests are free. Authorized representatives and lawful heirs may act on your behalf with proper proof. If your request concerns farm operational data, contact your farm administrator first; we will assist the farm in responding. We may decline a vexatious or unreasonable request as allowed by law, and we will explain why.

If you took part in the research, you may withdraw your consent by contacting the DPO. Withdrawal stops future research processing, but data already aggregated or published in a way that no longer identifies you may not be removable.

Data breaches

If we become aware of a personal data breach that requires notification, we will notify the National Privacy Commission and affected data subjects within **72 hours** of knowledge, as required by IRR Section 38. The notification will describe the nature of the breach, the data possibly involved, and the measures we took.

We may delay notification only to the extent allowed by law, such as to determine the scope, prevent further disclosure, or restore the integrity of the system. We will not conceal a breach. Contact the DPO if you suspect one.

Children

PakaonAI is intended for farm operators and adult research participants. We do not knowingly collect personal data from children. Accounts are issued by farm administrators, and research participants must be 18 or older.

If you believe a child's personal data has been provided, contact the DPO. We will assess the request and delete the data where appropriate.

Research participants

The capstone evaluates PakaonAI with **20 fish farmers** and **10 IT professionals** using a questionnaire based on ISO/IEC 25010:2023. Participation is voluntary and based on your informed consent.

What we collect

An optional name, the date, your role (IT expert, hardware/electronics expert, agriculturist, or farm operator/field expert), and your questionnaire answers. We do not ask for email, phone, audio, video, photos, or sensitive personal information.

How we collect and store it

- **Printed forms.** Kept in a locked cabinet accessible only to the researchers and shredded after the retention period.
- **Google Forms.** Responses stay in Google Forms/Drive and are accessible only to the researchers. The form is configured not to collect email addresses.
- No research response is exported to Supabase unless you separately provide contact details for follow-up.

Confidentiality and publication

We report results in aggregated or anonymized form. We do not name you, quote you, or publish your photo without separate written permission. The capstone paper may be published in a reputable research journal; only aggregated or anonymized results will be included.

Withdrawal

You may skip any question, stop at any time, or withdraw by contacting the DPO. There is no penalty. Withdrawal stops future processing; data already aggregated or published in a form that no longer identifies you may not be removable.

Retention

Until the capstone is completed and the resulting paper is published in a reputable research journal, then for the period required by the University's records policy or the journal's data-availability policy, whichever is longer. After that, the data is securely destroyed.

Changes to this policy

We may update this policy when the service, the law, or our processors change. The version number and last-updated date at the top of this page will change, and we will keep a version history below. For material changes, we will post a notice on the website and, where appropriate, send an email to the address on file before the change takes effect.

This version is a draft for University Legal Office review. It is not effective until the review is complete, the status changes to effective, and the approved effective date is posted.

Contact and complaints

For questions, requests, or complaints about privacy, contact our designated Data Protection Officer:

Jeff Edrick C. Martinez

PakaonAI Capstone Project, College of Information and Communication Technology, ISUFST Dingle Campus, Dingle, Iloilo, Philippines

Email: privacy@pakaonai.syntaxure.dev

You may also complain to the National Privacy Commission:

National Privacy Commission

25th–27th Floors, The Upper Class Tower, Quezon Avenue corner Scout Reyes Street, Quezon City, Philippines

Telephone: (+63) 2 5322 1322

Website: https://privacy.gov.ph

Complaints: https://privacy.gov.ph/contactus/

We would appreciate the chance to resolve your concern first. Contacting us does not prevent you from exercising your rights with the NPC.
